<p>The Arizona Substance Abuse Partnership (ASAP) was established by Executive Order 2007-12 in June 2007. Staffed by the Governor’s Office for Children, Youth, and Families and chaired by the Governor’s Policy Advisor for Human Services, who also serves as the Director for the Governor’s Office for Children, Youth and Families, the ASAP is composed of representatives from state governmental bodies, federal entities, and community organizations as well as individuals in recovery. The ASAP serves as the single statewide council on substance abuse prevention, enforcement, treatment, and recovery efforts and, through its Chair, is able to communicate the needs of the state to the governor. It is ASAP’s mission to ensure community-driven, agency-supported outcomes to prevent and reduce the negative effects of alcohol, tobacco, and drugs by building and sustaining partnerships between prevention, treatment, recovery, and enforcement professionals. Through coordination and collaboration among its members and their respective agencies and organizations, the ASAP strives to ensure that substance abuse is addressed in a comprehensive manner and that funding is spent efficaciously and efficiently.</p> <p>For 2012, the ASAP will concentrate its efforts toward the reduction of prescription drug abuse, through a multisystem pilot project in three counties based on a strategy that outlines the necessary efforts for law enforcement/criminal justice professionals and the prevention and medical/treatment communities.</p> <p>Two work groups assist the ASAP in meeting its goals:</p> <ul style="list-style-type: none"> • Substance Abuse Epidemiology Work Group (Epi Work Group) – The Epi Work Group’s mission is to provide communities, policymakers, and local, state, and Tribal officials with data on the use, consequences, and context of alcohol and illicit, over-the-counter, and prescription drugs to inform their substance abuse prevention and intervention strategies. The Work Group produces <i>The Impact of Substance Abuse: A Snapshot of Arizona</i> and behavioral health epidemiology profiles for use by community coalitions, agencies, and individuals in relevant fields. Additionally, the Work Group conducts analyses of individual substance abuse issues, responds to ad hoc data requests and brings data to bear on ASAP’s policy decisions around its strategic plan and focus areas. Further, the Work Group assists the ASAP to develop effective methods for integrating and expanding services across Arizona while maximizing available resources and supporting a data-driven decisionmaking process. • Communities Preventing Substance Abuse Work Group (CPSAWG) – The CPSAWG is a merger of two former subcommittees of the ASAP, the Underage Drinking Prevention Committee and the Community Advisory Board. This group brings together representatives from community coalitions around the state and state agency representatives to provide an essential link between community and state-level efforts. The CPSAWG brings the community voice to the ASAP table; reports on important community issues that inform ASAP’s work; helps communities improve their capacity to identify emerging trends, as well as take action and report on them to the proper institutions/authorities; takes the data available through the Epi Work Group and the ASAP back to coalitions and communities to effectively target prevention, treatment, recovery, and enforcement activities; serves as a resource for communities and the state to identify the most effective ways to reduce substance abuse through collaborative efforts and by targeting limited resources where they are most needed; and elevates and recognizes the important work being carried out at the community level to ensure that state-level responses are cognizant of the impact of policies on individual communities. 	

This work group assesses statewide epidemiological data, resources, strategies and policies, and builds relationships with Tribes, youth, law enforcement, government agencies, and community coalitions. By combining resources, practice, and research, the work group collaborates to reduce substance abuse.
