Note: In New Hampshire, an “underage alcohol house party” means a gathering of five or more people under age 21 at any occupied structure, dwelling, or curtilage, where at least one person under age 21 unlawfully possesses or consumes an alcoholic beverage. A person is guilty of a misdemeanor if he or she owns or has control of the occupied structure, dwelling, or curtilage where an underage alcohol house party is held and he or she knowingly commits an overt act in furtherance of the occurrence of the underage alcohol house party knowing persons under age 21 possess or intend to consume alcoholic beverages. Program description: Ten RNs are geographically designed to provide alcohol and drug prevention services and health promotion for every community in New Hampshire. The RNs’ primary focus is underage drinking and drug use prevention for individuals and the environments in which they live. RNs cast a wide net to convene and mobilize five core sectors—business, medical/behavioral health, educational institutions, safety, and local government—in environmental prevention strategies and interventions. Each RN has a data-driven prevention priority plan outlining local contributing risk and protective factors that align environmental approaches and targeted interventions. More than 60 subcontracted service providers strategically distributed throughout the 10 regions implement targeted prevention for selective and indicated populations (high-risk individuals) such as court diversionary programs, student assistance, parental/guardian education and skill building, and school-based education. As of June 30, 2011, all prevention direct service funds were eliminated.

Many campaigns are directed at the community at large, to dispel the belief that use/misuse is acceptable and a normal rite of passage, and that in fact it is harmful and is the cause of many negative consequences (e.g., car crashes, violence, and death).
