## Tennessee State Survey Responses

### State Agency Information

**Agency with primary responsibility for enforcing underage drinking laws:**
- Tennessee Alcoholic Beverage Commission

**Methods by which local and state enforcement agencies coordinate their efforts to enforce laws prohibiting underage drinking:**

State officials approach the local judiciary in certain counties to obtain permission to have underage buyers pose as customers in stores that sell alcohol. The “customer” is accompanied by law enforcement, who takes notes on how well the establishment responds. If the customer is able to purchase alcohol, the establishment is given a consequence.

Tennessee Prevention Network

URL for more program information: Not applicable

Program description: The Tennessee Prevention Network is a statewide prevention program directed at providing primary prevention services to individuals who have not been determined to require treatment for substance abuse. The Network’s services fall into two categories:

1. Selective prevention services, which include programs and practices delivered to subgroups of individuals identified based on their membership in a group that has an elevated risk for developing substance abuse problems. An individual's personal risk is not specifically assessed or identified, and it is based solely on a presumption given his or her membership in the at-risk subgroup.
2. Indicated prevention services, which include programs that focus on populations that are identified based on individual risk factors or initiation behaviors that put an individual at high risk for developing substance abuse problems. The individuals targeted at this stage, although showing signs of early substance use, have not yet reached the point where a clinical diagnosis of substance abuse can be made.

principles of effective prevention, or content and structure to interventions that appear in registries, federal agency publications, and/or peer-reviewed literature.

- Guideline 2: The intervention is supported by documentation of effective implementation in the past, including at least one replication, in a manner attentive to scientific standards of evidence and with results that show a consistent pattern of credible and positive effects.
