Program Description: Young driver crashes have decreased in recent years, but Montana is still one of the states with the highest rates of teen crashes. Vehicle crashes continue to be the primary cause of death and injury for 15- to 24-year-olds. Speed, distractions, impaired driving, and lack of seatbelt use are major contributing factors along with inexperience. Training novice drivers and reducing young driver crashes are primary goals of Montana’s Traffic Education Program. OPI began planning an update of the Traffic Education curriculum in December 2011, with the first phase completed in January–June 2012, and continued work on the update through 2013 with MDT grant support. The new curriculum incorporates the emerging new research on brain development, scanning for hazards, attention maintenance, risk assessment, and decisionmaking, and provides teachers the tools they need to meet these challenges. The “alcohol and other drugs” module includes updated research and resources on the effects of alcohol and drugs on the brain, body, and the driving task; alcohol-involved crashes; refusal skills; and Montana’s Minor in Possession laws. DUI consequences related to alcohol, prescription drugs, and marijuana use were included along with the 2013 statute § 61-8-411, MCA, which sets the 5ng/ml standard for delta-9-tetrahydrocannabinol.

The redesigned Montana traffic education curriculum update met the following goals:

- 2006 modules were redesigned to move from text-heavy PowerPoint presentations to more engaging learner-centered activities with real world driving scenarios and driver decision points. The revision will help students develop the knowledge, skills, and attitudes necessary to safely operate a motor vehicle.
- Statistics and other factual data were updated and presented in engaging formats.
- The curriculum was based on evidence-based strategies and current best practices as described in the *National Standards for Driver Education, Parent and Teen KEYS Homework*, and the National Highway Traffic Safety Administration's *A Fresh Look at Driver Education in America*. The curriculum was adapted to fit Montana's specific laws, standards, and program requirements while maintaining the integrity of the content and methods of the curriculum.

The updated Montana Traffic Education Curriculum was to be distributed to 200 teachers attending the April 2014 Montana Traffic Education Association Conference. In January 2012, OPI adopted revised Administrative Rules of Montana (ARM) 10.13 with the addition of Traffic Education Content, Benchmarks, and Performance Standards and made parent meetings a requirement (rather than an option) of the Traffic Education Program. A new module is included for mandatory parent meetings, to inform both young novice drivers and their parents/guardians of graduated drivers licensing (GDL) guidelines and best practices which require use of safety belts, limits passengers, restricts night driving, and addresses distracted driving. Parents or guardians must sign an affidavit confirming 50 hours of supervised driving practice and 6 months with no alcohol, drug, or traffic offenses before teens can receive a GDL-restricted license for independent driving.

Youth Risk Behavior Survey – Montana Office of Public Instruction

Program Description: This program is designed to identify and correct youth misperceptions about peer alcohol, tobacco, and other drug use. Research indicates people tend to behave in the way they believe is most typical and accepted by their peers. Studies also show that youth tend to overestimate the number of peers who engage in risky behaviors. Bridging the gap between perception and reality is intended to increase protective factors and reduce numbers of youth participating in risky behavior. Students are surveyed utilizing Classroom Performance System (CPS) clickers, which provide immediate classroom perception feedback. Student perception data are then compared with actual data collected from the most recent Youth Risk Behavior Survey, and misperceptions are identified. This leads to a healthy discussion about why misperceptions exist, and how we are influenced by media.

<p>Program Description: Montana Department of Transportation: DUI task forces are multifaceted coalitions that invite participation from a cross-section of community representatives to maximize their reach and effectiveness. The task forces operate at the county level to reduce and prevent impaired driving. They may engage the community in a variety of activities such as Responsible Alcohol Sales and Service Training, retail compliance checks, party and keg patrols, overtime traffic patrols, education and media advocacy, public service announcements, victim impact panels, support for prosecution and adjudication of DUI cases, and designated-driver and safe ride home programs. It is difficult to estimate the number of youth served or participating in the DUI Task Forces across the state.</p>
