Drawing on Motivational Interviewing (Miller & Rollnick, 2002) and Social Norms Theory (Perkins & Berkowitz, 1986), e-CheckUp is designed to motivate individuals to reduce their consumption using personalized information about their own drinking and risk factors, and provide those who have not yet chosen to drink with valuable information so that, if they do choose to drink in the future, they are able to make well-informed decisions. It is also customized for each campus, using the most recent alcohol and other drug survey information from that campus. The e-CheckUp takes about 15 minutes to complete (depending on the student). Students' personalized feedback includes information shown to be particularly motivating to college-aged young adults, including: quantity and frequency of alcohol use, amount of alcohol consumed, normative comparisons, physical health information, amount and percentage of income spent on alcohol, negative consequences feedback, explanation, advice, and local referral information.
