Additional Information Related to Underage Drinking Prevention Programs

State collaborates with federally recognized tribal governments in the prevention of underage drinking Yes

Description of collaboration: Arizona has intergovernmental agreements with the Gila River Indian Community and Pascua Yaqui Tribe to provide alcohol-related substance abuse prevention services. Arizona subcontracts to private nonprofit corporations (Regional Behavioral Health Authorities) that (1) provide alcohol-related substance abuse prevention services directly to the San Carlos Apache Tribe, (2) provide alcohol-related prevention services to the Ak-Chin Indian Community and Hopi Nation, and (3) work collaboratively to write grants and develop capacity to deliver alcohol-related substance abuse prevention services with the Hualapai Nation.

State has programs to measure and/or reduce youth exposure to alcohol advertising and marketing Yes

Description of program: Develop and support a community campaign that increases the compliance with existing statutes that prohibit the sale of alcohol to minors and inebriated patrons; and prohibitions against excessive alcohol marketing in the form of billboards and vinyl banners.

State has adopted or developed best practice standards for underage drinking prevention programs Yes

Agencies/organizations that established best practices standards:	
Federal agency(ies):	No
Agency(ies) within your state: Arizona Department of Health Services, Division of Behavioral Health (ADHS/DBHS)	Yes
Nongovernmental agency(ies):	No
Other:	No

Best practice standards description: Evidence-based practice (EBP) review teams are assembled to review and evaluate all Arizona Department of Health Services/Division of Behavioral Health Services subcontracted prevention programs to determine which are evidence based, using criteria recommended by the Substance Abuse and Mental Health Services Administration (SAMHSA). In addition to fulfilling block grant requirements, the purpose of the EBP review is to provide an opportunity for learning and improvement among Arizona’s prevention community. Each EBP review team consists of a member of ADHS/DBHS, one to two provider representatives, a Regional Behavioral Health Authority (RBHA) representative, and a research representative. Each team reviews 8 to 12 programs. The definition of “program” within the ADHS/BHS RBHA system is “a set of prevention strategies, which address a common set of goals and objectives for a common target audience in one county.” This definition is broad and intended to serve as an umbrella to encompass many strategies used by a provider. The information viewed under this definition combines all prevention strategies, activities, and/or curriculum under one program. Reviewers use the program logic model, program descriptions, strategies, and outcomes to assess whether the overall program meets the criteria of being evidence based. The criteria to be considered evidence based are based on the SAMHSA National Registry of Evidence-based Programs and Practices (NREPP) criteria. To be deemed an evidence-based practice, a program/strategy must meet the following criteria: (1) Included on federal lists or registries of evidence-based interventions, (2) reported (with positive effects) in peer-reviewed journals; and (3) documented effectiveness supported by other sources of information and the consensus judgment of informed experts:

- *Guideline 1:* The intervention is based on a theory of change that is documented in a clear logic or conceptual mode.
- *Guideline 2:* The intervention is similar in content and structure to interventions that appear in registries and/or the peer-reviewed literature.
- *Guideline 3:* The intervention is supported by documentation that it has been effectively implemented in the past, and multiple times, in a manner attentive to scientific standards of evidence and with results that show a consistent pattern of credible and positive effects.
- *Guideline 4:* The intervention is reviewed and deemed appropriate by a panel of informed prevention experts that includes well-qualified prevention researchers experienced in evaluating prevention interventions similar to those under review, local prevention practitioners, and key community leaders as appropriate, e.g., officials from law enforcement and education sectors or elders within indigenous cultures.

In addition to the above guidelines, ground rules are set for how the groups formulate their expert judgments: (a) The team must come to a consensus for a “yes.” (b) No consensus is needed for a “no.” An “I don’t know,” “I’m not sure,” “I can’t judge this,” or “I need more information” is simply a “no.” (c) Program funding and jobs are not in jeopardy if a program receives a “no.” (d) Programs that would be “yes” due to Guideline 1 or 2 still must demonstrate logical grounding.
