

# ILLINOIS STATE REPORT

## Underage Drinking Prevention and Enforcement

2018

**SAMHSA**  
Substance Abuse and Mental Health  
Services Administration

This State Report is required by the Sober Truth on Preventing (STOP) Underage Drinking Act (Pub. L. 109-422), which was enacted by Congress in 2006 and reauthorized in December 2016 as part of the 21st Century Cures Act (Pub. L. 114-255). The STOP Act requires an annual report “on each State's performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking.” As directed by the STOP Act, the State Reports were prepared by the Interagency Coordinating Committee on Preventing Underage Drinking (ICCPUD), which is chaired by the Assistant Secretary for Mental Health and Substance Use, U.S. Department of Health and Human Services.

**Time period covered by this State Report:** The 2018 State Report primarily includes data from calendar year 2017. The state legal data reflects the status of the law as of January 1, 2017. The state survey data was collected in 2017 and was drawn from the most recent 12-month period in which the states maintained the data.

<b>Number of Fatalities Involving 15- to 20-Year-Old Driver with BAC &gt; 0.01</b>	19
<b>Percentage of All Fatal Crashes Involving 15- to 20-Year-Old Driver</b>	14%

\*Note that in previous years, the numbers and percentages for past-month binge drinking by age group were included in these profiles. These data are not included as a separate category this year. The definition of binge drinking used in the National Survey on Drug Use and Health (NSDUH) changed in 2015 and insufficient state-level data using the new criteria exist. As more years of consistent data become available, the state profiles will include past-month binge drinking as a separate sub-group of past-month alcohol use. For more information, see <https://www.samhsa.gov/data/sites/default/files/NSDUH-TrendBreak-2015.pdf>.

#### Additional Clarification

In an effort to increase retailer compliance with laws and regulations the Illinois Liquor Control Commission (ILCC) started a new program called the LC – 13 Project. Through the LC – 13 Project, the ILCC is forming a partnership with various local government agencies, law enforcement, fire departments, health inspectors and code enforcement specialists to play a role in retail compliance inspections. As a local reporting project for inspecting local liquor retailers the ILCC will provide education and training to assist in the inspections. The training will entail; Illinois Liquor laws, ILCC Rules and Regulations and how to conduct local inspections. Training will be conducted by the ILCC staff and will consist of 3.5 hours of classroom training, 3 hours of field training and on-going support from the Commission. Once a community participates in the training, the trained inspectors will conduct routing compliance inspections in their local jurisdictions.

The goal and objectives of LC – 13 include:

- Increase public safety through education and communication with local liquor retailers and local officials.
- Enhance compliance with laws, rules and ordinances achieved in greater levels by liquor retailers with the assistance of local government agencies.
- Form a greater cooperation between the ILCC, local government agencies and liquor licensees.
- Build relationships between local businesses and government agencies.
- Provide public service to the general public and local business community.

<sup>1</sup> Or having consumed or purchased per state statutes.

<sup>2</sup> Underage compliance checks/decoy operations to determine whether alcohol retailers are complying with laws prohibiting sales to minors.

<sup>4</sup> Does not include fines imposed by local agencies.

<sup>5</sup> Does not include suspensions imposed by local agencies.

<sup>6</sup> Does not include revocations imposed by local agencies.

#### Underage Drinking Prevention Programs Operated or Funded by the State

**Program Description:** The Strategic Prevention Framework-Partnerships for Success (SPF-PFS) grant supports nine providers and their multi-sector coalitions in using the SPF process to reduce past 30-day alcohol use rates and negative consequences of underage drinking among 8th to 12th graders. The SPF is a five-step planning process to guide the selection, implementation, and evaluation of effective, culturally appropriate, and sustainable substance

abuse prevention activities. The effectiveness of this process begins with a clear understanding of community needs and depends on the involvement of community members in all stages of the planning process. The SPF components are assessment, capacity building, strategic planning, implementation, and evaluation. Cultural competency and sustainability are expected to be included in every component of the framework. The SPF-PFS program supports providers and their multi-sector coalitions in planning for and delivering services in communities that have higher rates of underage drinking compared to the state average. Providers and their coalitions develop local strategic plans to address underage drinking within their targeted community areas. Sub-recipients will use a data-driven process in FY17 to reduce underage drinking at the community level by (1) working with a local, multi-sector coalition, (2) completing a needs assessment process that will inform the development of a strategic plan, (3) developing a local strategic plan, and (4) delivering evidence-based strategies.

The goals of the SPF-PFS project are to:

1. Decrease past 30 day alcohol use among 8th-12th grade youth and among identified vulnerable populations (where applicable).
2. Reduce the number of alcohol-related emergency department visits.
3. Reduce one or more of the following outcomes: perception of parental disapproval/attitude of underage drinking (UAD), perception of peer disapproval/attitude of UAD, perceived risk or harm of use of UAD, and family communication about alcohol use.
4. Impact one or more contributing factors (also referred to as risk and protective factors) for UAD among 8th-12th grade youth:
  - Perceived risk of harm associated with daily drinking and binge drinking
  - Personal disapproval of youth alcohol use
  - Perceived peer attitudes (norms) associated with youth alcohol use (e.g., how “cool” they would be perceived by peers if they used alcohol)
  - Perceived parental disapproval of youth alcohol use

**Program Description:** The goal of the Strategic Planning Framework – Partnerships for Success (SPF-PFS) grant program is to reduce consumption of, consequences from, and contributing factors to alcohol, tobacco, marijuana, and prescription drug misuse/abuse among 11- to 20-year-olds in a targeted geographic community by following the SPF. This grant is designed to support the use of the SPF, developed by SAMHSA. SPF is a structured planning process that can be applied to prevention systems at both state and local levels. This process is an effective way for coalitions to address substance abuse issues within the community. SPF is intended to provide a structure or mechanism for multisector coalitions and other broadly represented community organizations to identify the most pressing substance abuse problems in their community. SPF uses a data-driven approach to understand what the

most pressing problems are, who is affected most by the problems (consumption and consequences), why the problems are happening (contributing factors or intervening variables), and what programs, practices, and policies are most effective in addressing these problems and contributing factors. The Substance Abuse Prevention Program (SAPP) are the state-wide funded prevention services contracted through organizations across Illinois and they also are addressing underage drinking within their local communities through a variety of prevention strategies.

### Additional Clarification

No data

In addition to the state expenditures on underage drinking prevention reported in the annual STOP Act Survey, all states receive federal funds for substance abuse prevention through Substance Abuse Prevention and Treatment Block Grant (SABG) funds, administered by the Substance Abuse and Mental Health Services Administration (SAMHSA). Exhibit 1 shows the sources that Illinois used for expenditures on substance abuse prevention and treatment in 2017. As indicated, SABG funds and state funds account for the largest sources (46.2 percent and 28.0 percent respectively).<sup>27</sup>

States submit Behavioral Assessment and Plan reports that include their priorities for use of SABG funds, as well as planned expenditures. For FY 2018-2019, Illinois designated increasing the percentage of youth prevention education services that demonstrate adherence to 80 percent of implementation fidelity standards as part of the number one priority for use of SABG funds.<sup>28</sup>
